INVESTOR EQUITY — $500K CASH-IN

Scenario A — NewCo SPV (asset-level)	
Target EV (fair mid)	**$2.45M**
Less: new debt	**($2.00M)**
NewCo equity pre-money	**$0.45M**
+ Investor cash	**$0.50M**
NewCo equity post-money	**$0.95M**
INVESTOR STAKE	**~52%**

Scenario B — Capitaliply Holding (consolidated)	
Combined EBITDA	**$1.09M**
EV @ 5x EBITDA	**$5.44M**
Less: total debt ($3.13M)	**($3.13M)**
Holding equity pre-money	**$2.30M**
+ Investor cash	**$0.50M**

RECOMMENDED: Scenario B at **20-25% stake** on $2.0-2.5M pre-money (holding-level investment). Includes 1x non-participating liq preference, broad-based anti-dilution, 1 board observer, KPI reporting, and reserved-matter consent rights.

KEY RISKS — LENDER & INVESTOR VIEW

#	Risk	Impact	Critical mitigant
1	Shopify 15% revenue share (currently NOT enforced)	$339K EBITDA/yr; DSCR drops to 0.68x	Cash sweep + rate step-up; 6mo DS reserve
2	DSCR < 1.25x in base case (already 0.99x)	Covenant breach risk from day 1	10yr tenor + 2yr IO; covenant set at 1.0x
3	Organic portfolio in decline -5.4% YoY	ARR erosion; growth purely M&A-driven	Min portfolio ARR floor covenant

4	Refinance wall: $500K due Dec 2026 - May 2027	Cash crunch overlap with new debt	Pre-close refi or standstill agreements
5	QofE not done; seller-prepared target figures	5-20% FCF haircut risk	Mandatory Big-4 QofE; R&W insurance/escrow
6	Informal/crypto debt repayment (€33K Lavkov)	AML/tax exposure	Formal docs pre-close; counsel opinion
7	Concentration: top 2 apps = 63% revenue	Single-app failure = severe shock	Cross-collateral; monthly app KPI pack

VERDICT — LENDER: Approve **only with restructured terms** (10yr tenor, 2yr IO, 1.0x DSCR cov, cash sweep, 6mo DS reserve, mandatory QofE). Vanilla $2M @ 12% / 7yr FAILS DSCR. **VERDICT — EQUITY INVESTOR:** $500K for **20-25% holding stake** with downside protection is fair; Scenario A (52% NewCo) only attractive if investor wants operational control.
